

## **About the KMS Werkzeugmaschinen GmbH**

Prompt and flexible action owing to short decision-making channels and competent and highly-efficient staff – we met this challenge every single day. As a medium-sized company headquartered in the Bleiburg Austria area the company focuses in particular on services in mechanical engineering and customized engineering.

Many well-known companies, among from Austria and Germany relied on our services standing out for flexibility and quality. The more complex the machine or system is, the more important is preventive maintenance or maintenance in general. This is the only way to ensure maximum productivity, availability and efficiency of your machine. For that very reason we provide services going far beyond traditional maintenance works. On request we also take care of every aspect of complete areas of service to give you more time and space to concentrate on the main competences of your company.

Continuous expansion of our service portfolio, customized solutions and the resulting customer satisfaction are our principles for today and tomorrow, providing, at the same time, the foundations for a positive future development.

Your KMS team

## Service portfolio

### Repair

Mechanical, electrical and specific software problems/mistakes are repaired round-the-clock by our specialist staff in the field service.

### Maintenance- Relocation of machines

As a service provider in the field customer service we follow the motto „service from one single source“, this providing comprehensive all-round services to cover a large variety of fields related to mechanical engineering:

- Installation and demounting of production lines
- Relocation of machines (mechanically and electrically), including automation
- Initial start-up and re-start of machines
- Programming of NC modules
- Optimisation of fixture, tool and cycle time
- Final acceptance (MFU/PFU) of the machine or system
- Machine maintenance

## **Spindle service and engine service**

Our spindle service is based on the many years of experience in servicing all makes and brands independent of the manufacturer. We do not compromise and use only high-quality replacement components.

This helps minimizing downtimes and maximizing productivity, which must be our common aim. Here is an excerpt of the makes we offer: VDI, Pibomulti, Fischer, Weis, Omlat, Kessler, IBAG, EURO, Heckert, TDM and many more.

## **New installations**

We accompany complete projects, started at mechanical basic works, about the electric wiring of complicated manufacturing lines, up to the programming of the parts NC.
